

## Accessibility at KAZ online

At KAZ Online we try to keep the needs of all our users in mind at all times and constantly strive to make our site accessible for all - regardless of race, religion, colour, gender, marital status, sexual orientation or disability.

Our pages are designed to work with a wide range of web browsers on Windows and Mac computers. All our pages and graphics are optimised for fast downloading.

We have adopted the following provisions when putting pages together:

- Simple, fresh and uncluttered presentation style.
- Easy to read typeface.
- High foreground and background colour contrast.
- Use of clear and simple grammar.
- Provision of simple and consistent site navigation.
- Use of ALT text behind images.
- Audio and text versions for users with visual or hearing impairments.
- Provision of a 'speaking keys' option covering the main 'a to z keys' lessons for visually impaired users.
- Scalable course display size to 50, 60, 70, 80, 90 or 100% of screen.

*The power of the Web is in its universality. Access by everyone regardless of disability is an essential aspect.*
